J.S. Patent and Trademark Office PTOL-326 (Rev. 1-04) Office A	ction Summary	Part of Paper No./Mail Date 062605			

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-4 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-6 of copending Application No. 10/768,674. Although the conflicting claims are not identical, they are not patentably distinct from each other because the instant claims encompass the claimed polycarbodiimide of the copending application.

This is a <u>provisional</u> obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Application/Control Number: 10/773,296 Page 3

Art Unit: 1711

3. Claims 1-4 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1 and 6-8 of copending Application No. 10/934,727. Although the conflicting claims are not identical, they are not patentably distinct from each other because the polycarbodiimide of the instant claims is obvious in view of the polycarbodiimide within the copending claims.

This is a <u>provisional</u> obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

4. Claims 1-4 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-9 of copending Application No. 10/757,512. Although the conflicting claims are not identical, they are not patentably distinct from each other because the polycarbodiimide of the instant claims is obvious in view of the polycarbodiimide within the copending claims.

This is a <u>provisional</u> obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

- 5. It is noted that a Notice of Allowance for Application No. 10/757,512 was mailed to applicants on December 30, 2004. Though the application had not issued as a patent at the time of this action, the provisional obviousness-type double patenting rejection will be converted to a non-provisional rejection once the application issues.
- 6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

7. Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Saito et al. ('214).

Patentees disclose polycarbodiimide copolymers and their production, wherein the use of blends of diisocyanates is disclosed and naphthalene diisocyanate is disclosed as being an especially preferred reactant. See column 1, lines 54+ and column 2, line 35. Patentees further disclose solutions of the polycarbodiimides in aprotic solvents and termination of the polycarbodiimides with monoisocyanates at column 4, lines 20+. Lastly, patentees disclose reaction temperatures within the examples that meet those claimed.

8. Though patentees fail to disclose applicants' claimed ratio relationship between formula (1) and formula (2) of claim 1 or the 5% minimum of claim 5, the position is taken that the production of polycarbodiimide copolymers that satisfy the claims would have been obvious to one of ordinary skill in the art, given the broad range of ratios between formula (1) and formula (2) encompassed by the claims and in view of the fact that patentees specifically recite copolymers and the preferred use of naphthalene diisocyanate. Furthermore, the position is taken that the endpoint of the recited ratio (claim 1) or percent content (claim 5) is close enough

to zero (denoting a naphthalene diisocyanate-based homopolymer) or 100%, respectively, that one of ordinary skill in the art would have expected such copolymers to have the same properties as the disclosed naphthalene diisocyanate-derived polycarbodiimide homopolymer. *Titanium Metals Corp. of America v. Banner*, 778 F.2d 775, 227 USPQ 773 (Fed. Cir. 1985). Applicants have provided no showings of unexpected results relative to the polycarbodiimides of Saito et al.

- 9. The examiner has considered applicants' response; however, the rejection has been maintained for the aforementioned reasons. Given the teachings of the reference, applicants have not established that the claimed polycarbodiimides are not *prima facie* obvious in view of Saito et al.
- 10. It is noted that the naphthalene diisocyanate percent content of claim 5 is not fully equivalent to the ratio of m to n within claim 1. Given that n designates the non-naphthalene diisocyanate residue of claim 1, the ratio of claim 1 specifies a percent content for naphthalene diisocyanate residue of 1% to 95%.
- Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication should be directed to R. Sergent at telephone number (571) 272-1079.
